EDUCATION

Massachusetts Institute of Technology — **Cambridge, MA**
May 2028
GPA: 4.6/5.0

- Masters of Science in Computer Science and Engineering
- Relevant Coursework: Software Construction, Deep Learning, Design and Analysis of Algorithms, Software Performance Engineering, Natural Language Processing

EXPERIENCE

Amphibious Achievement — **Cambridge, MA**
Executive Director — Sep 2023 – Present

- Led recruitment and outreach efforts, recruiting over 200 applicants from across 30 high schools in the Greater Boston area
- Developed and led project-based computer science curricula covering Machine Learning, Image Processing, and Game Development for students with varying technical backgrounds
- Managed a team of instructors while overseeing lessons for 40+ students

MIT STAR Lab — **Cambridge, MA**
Undergraduate Researcher – PI: Kerri Cahoy — Jun 2026 – Present

- Optimized an agentic satellite imagery analysis pipeline by parallelizing search and image analysis within bounded geospatial data, making the process 4x more efficient and improving response quality
- Scaled the pipeline to 2,000+ events and developed a system to automatically record and organize analysis results
- Refined location selection accuracy, reducing overall costs by 10%

MIT Electrical Engineering and Computer Science Department — **Cambridge, MA**
Course Assistant — Feb 2026 – Present

- Provided 1:1 technical support for students in Introduction to Computer Science (6.100) and Introduction to Machine Learning (6.390), guiding problem solving and code troubleshooting
- Tested and modified course material to identify potential issues and improve clarity for 300 students

MIT Global Teaching Labs - Cape Verde — **Praia, Cape Verde**
Program Lead — Jan 2025 – Present

- Lead the design of multiple month-long program curriculums integrating Computer Science, Machine Learning, and Entrepreneurship fundamentals
- Taught over 30 high school and college students in Cape Verde to design, create, and pitch their own app ideas, bridging language barriers by translating between Kriolu and English

PROJECTS

Independent Project - Flappy Bird with Reinforcement Learning | *Python, PyTorch, Pygame*

- Designed a custom learning environment in Pygame, with state representation, reward functions, and real-time visualization for training a DQN-based agent
- Implemented a PyTorch DQN with experience replay and target networks, improving performance through reinforcement learning
- Developed a Matplotlib-based diagnostic system to visualize agent performance across iterations

SKILLS

- **Languages:** Python, Java, JavaScript, C, HTML/CSS, JSON
- **Libraries/Tools:** PyTorch, Git, DigitalOcean, Microsoft Azure
- **Frameworks:** React, Spring Boot, FastAPI
